**Looking voluntary  for IT-Support!**

Are you expirienced in programming apps and software for Windows-based systems (Power App)? And would you like to use your skills for meaningfull and sustainable projects?

Then join our team of volunteers! We are looking for a person to help us develop and maintain a permanent medical documentation system. In our projects at the european external borders, we assist many people every month and need a suitable documentation system for this purpose.

Initially, it will be a bit more demanding to modify the existing system, but once it's in place, we would be happy if you could help us maintain and support the system.

Are you eager to contribute and ensure thas as many people as possible have acces to medical care? Then get in touch with us now at application@medical-volunteers.org for an introduction and more information.

We are looking forward to hearing from you!
